SAGE, a tool for local water management

The 2023 edition

The development of a SAGE

The SAGE is developed collectively by the water actors of the territory grouped together in a deliberative assembly, the Local Water Commission (Commission Locale de l'Eau, CLE).

> Number of SAGE in France (january 2023)

Average number of people in a CLE in 2023

SAGE approval

20(

This step involves the concrete implementation of the SAGE, through the orientations and provisions it contains.

54%

IN 2023

SAGE implemented

38% in 2013 81% in 2023 VS

Evolution of the number of SAGE by status

The steps in the life of a SAGE

NOT STARTED

The State services identify the hydrographic units likely to be covered by a SAGE.

EMERGENCE

- A preliminary file relating to the SAGE is made ;
- The basin committee and the prefect assess the relevance of the project.

INSTRUCTION

- The perimeter boundary order is signed ;
- Some reflections about the CLE composition start.

FORMULATION

- The creation of the CLE is signed ;
- The drafting of SAGE documents begins: they are subject to a consultation and a public inquiry;
- The documents are validated by the CLE.

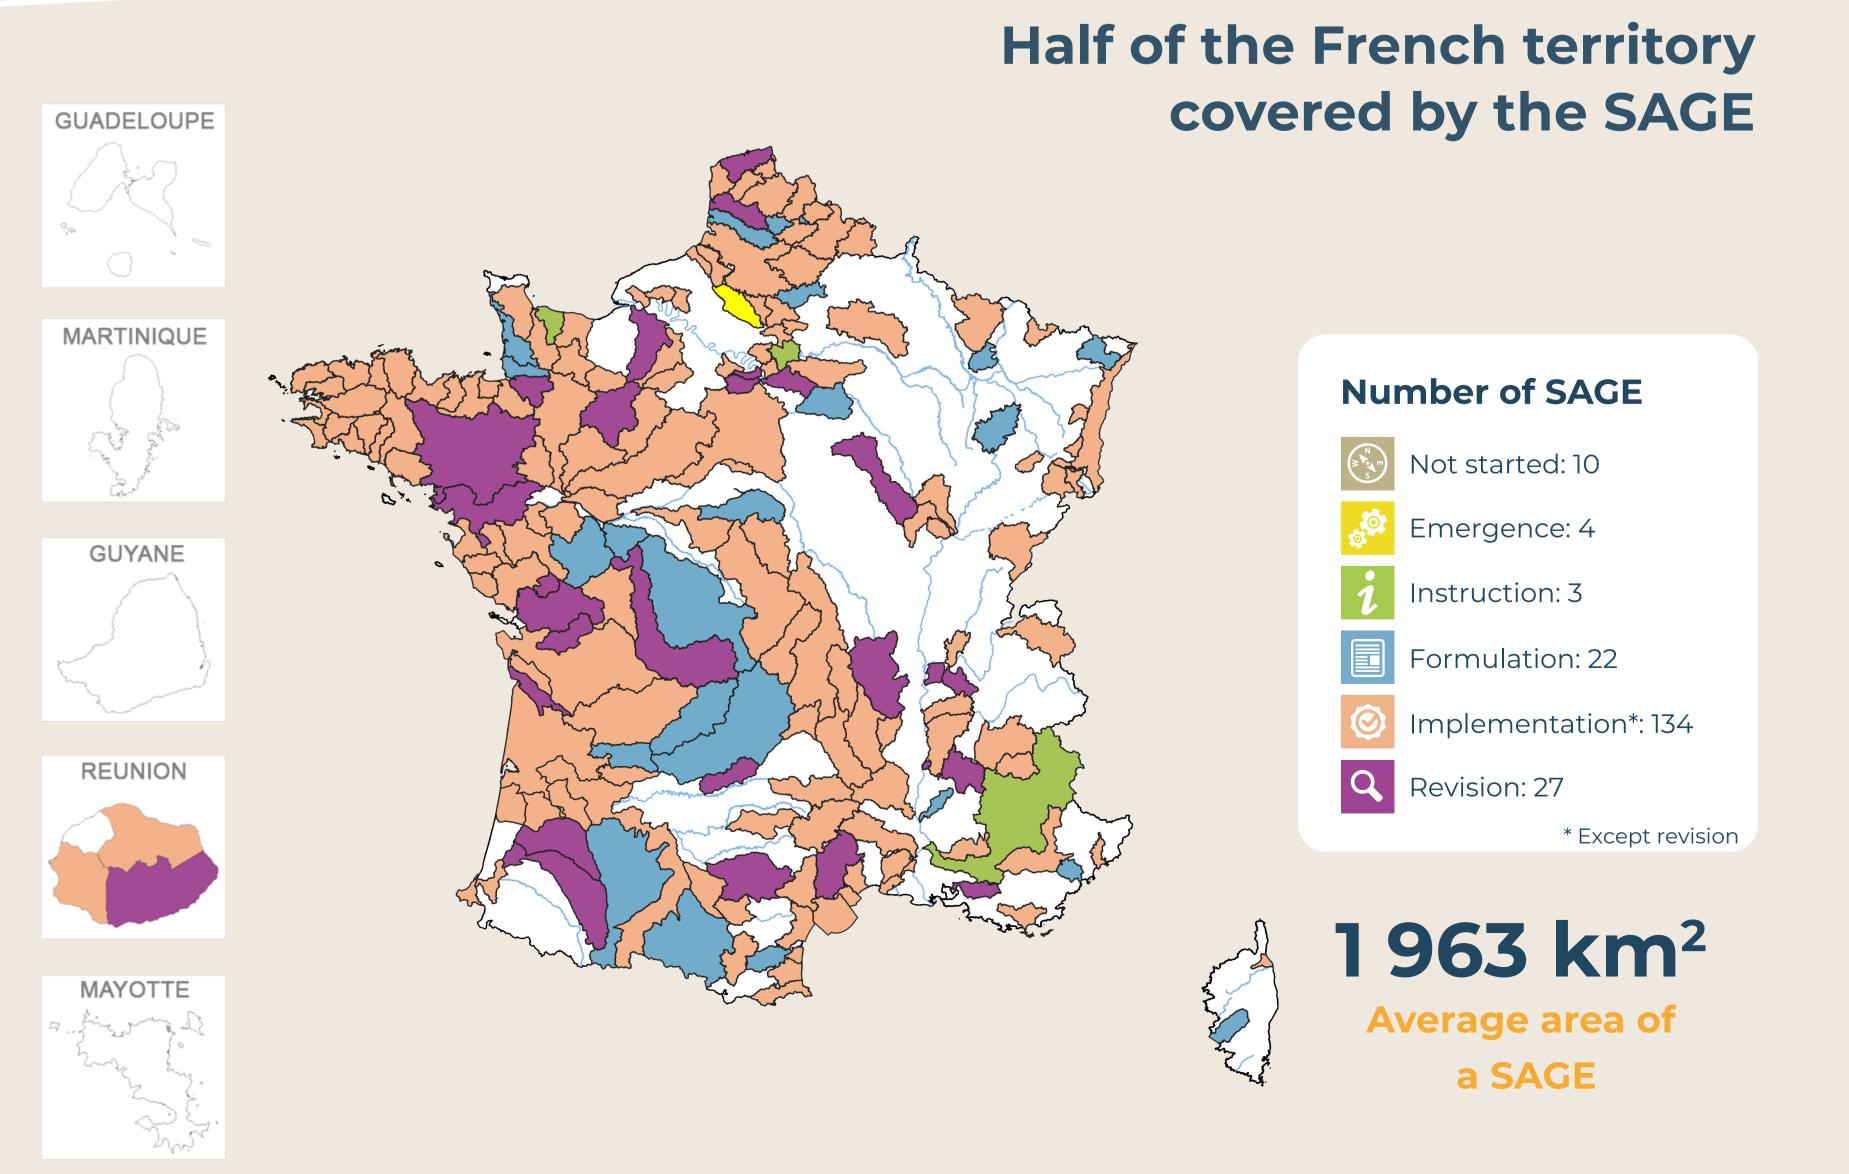

IMPLEMENTATION

- The approval order is signed ;
- The concrete actions implementation begins on the field.

REVISION

- The SAGE may be updated when substantial changes, altering the general scheme of the document or having consequences for third parties must be made;
- The SAGE approval order is revised and signed: it continues its "implementation".

GEST^{EAU}

The objective is not to cover the entire territory, but to locally use a SAGE when water conditions and pressures on aquatic environments (pollution, water withdrawals, morphological degradation) justify it.
